Physical Fitness Training Plan: Overview for Physician

Physical fitness is most easily understood by examining its components, or "parts." There is widespread agreement that these four components are basic.

- 1. Cardiorespiratory Endurance the ability to deliver oxygen and nutrients to tissues, and to remove wastes, over sustained periods of time. Long runs and swims are among the methods employed in measuring this component.
- 2. **Muscular Strength** the ability of a muscle to exert force for a brief period of time. Upper-body strength, for example, can be measured by various **weight-lifting exercises**.
- **3. Muscular Endurance** the ability of a muscle, or a group of muscles, to sustain repeated contractions or to continue applying force against a fixed object. **Pushups** are often used to test endurance of arm and shoulder muscles.
- **4. Flexibility** the ability to move joints and use muscles through their full range of motion. The **sit-and-reach test** is a good measure of flexibility of the lower back and backs of the upper legs.

THE WORKOUT SCHEDULE

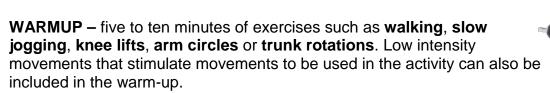

The physical fitness training plan will include something from each of the four basic fitness components described above. Each workout will begin with a warm-up and end with a cool down. As a general rule, the workouts will be spaced throughout the week

and avoid consecutive days of hard exercise.

Approximately three (3) hours each week.

throughout the duration of the basic academy, will be dedicated to physical fitness training.

Here are the amounts of activity necessary for the average, healthy academy cadet to maintain and/or increase his or her overall level of fitness. Included are some of the popular exercises we will be using in each category.

MUSCULAR STRENGTH – approximately two 20 minute sessions per week that include exercises for all the major muscle groups. **Lifting weights** is the most effective way to increase strength. The use of fitness cords and bands can be used to reduce the risk of injury and to keep equipment costs at a minimum.

MUSCULAR ENDURANCE – approximately three 30 minute sessions each week that include exercises such as calisthenics, pushups, sit-ups, pull-ups, and weight training for all the major muscle groups. The use of fitness cords and bands can be used to reduce the risk of injury

and to keep equipment costs at a minimum.

CARDIORESPIRATORY ENDURANCE – approximately three 20 minute bouts of continuous aerobic (activity requiring oxygen) rhythmic exercise each week. Popular aerobic conditioning activities include **brisk walking**, **jogging**, **swimming**, **cycling**, **rope-jumping**, **rowing**, cross-country skiing, and some continuous action games like **racquetball** and **handball**.

FLEXIBILITY – ten to twelve minutes of stretching exercises performed slowly without a bouncing motion. This can be included after a warm-up or during a cool down.

COOL DOWN – approximately five to ten minutes of slow walking, low-level exercise, combined with stretching.

Sample One (1) Hour Workout:

- 1. Warm Ups: Trunk Rotations, Arm Circles, Lunges, Stretching 10 Min
- 2. Muscular Endurance: Push Ups, Sit Ups, Pull Ups 10 Min
- 3. Cardio Respiratory Endurance: □30 Minute Class Run 30 Min
- 4. Flexibility/Cool Down: Slow Walk, Stretching 10 Min

*Pace will vary based on fitness level of group running; classes can be broken into different groups based on individual fitness level (i.e., beginning, advanced, etc.).

- 6. Student Participation in Basic Recruit Training Program Activities. Defensive Tactics (includes chemical agent contamination), Firearms, and Physical Fitness
 Conditioning and Physical Fitness Testing: High-liability training in defensive tactics, firearms, and chemical agent contamination is a component of the curriculum mandated by the Criminal Justice Standards and Training Commission and participation in the activities is a requirement for successfully completing a BRTP. There is no pass or fail at this time. The test results for each of the five required tests will be recorded on the Academy Physical Fitness Standards Report, form CJSTC-67A as "I" if the student did not perform the test component or "D" if the student was dismissed from the basic recruit training program.
 - A. Defensive Tactics and Firearms Training. Firearms training requires firing a handgun and long gun creating exposure to lead. Defensive tactics training requires sustained physical exertion and chemical agent contamination to the chemicals oleo-resin capsicum (OC) and/or orthochlorobenzal-malonotrite (CS).
 - B. Physical Fitness Conditioning and Physical Fitness Testing. The Physical Fitness Test includes the following measures and are defined as follows:
 - Vertical Jump. This measures leg power by measuring how high a person jumps.
 - One Minute Sit Ups. This measures abdominal, or trunk, muscular endurance. While lying on his or her back, the student will be given one minute to do as many bent-leg sit ups as possible.
 - 300 Meter Run. This measures anaerobic power, or the ability to make an intense burst of effort for a short time period or distance. This component consists of sprinting 300 meters as fast as possible.
 - Maximum Push Ups. This measures the muscular endurance of the upper body. This component consists of doing as many push ups as possible until muscular failure. Males are required to perform the standard push-up and females have the option to perform the standard or modified push-up.
 - 1.5 Mile Run/Walk. This measures aerobic power or cardiovascular endurance (stamina over time). To complete this component, the student runs or walks a distance of 1.5 miles as fast as possible.
 - C. A physical fitness conditioning program developed by the training school shall be attached to form CJSTC-75B prior to the student's examination by a physician, certified advanced registered nurse practitioner, or the physician's assistant.
- 7. Medical Conditions Regarding Chemical Agent Contamination. The student shall review the listed medical conditions and list other conditions that may restrict him or her from participating in Chemical Agent Contamination to the chemicals oleo-resin capsicum (OC) and/or orthochlorobenzal-malonotrite (CS).
- 8. Basic Recruit Training Program Activities Certification. The student shall check the appropriate box to indicate if he or she does or does not have a medical condition that would restrict participation in the BRTP activities indicated in item numbers 6, 6A, and 6B of this form.
- 9. Student's Printed Name. The student shall print his or her first name, last name, and middle initial.
- 10. Student's Signature and Date. The student shall provide a signature and date to verify the information provided by the student is true and correct.
- 11. Prior Exposure to Chemical Agent Contamination. The student shall Indicate in the appropriate box if he or she has been previously exposed to chemical agent contamination to the chemicals oleo-resin capsicum (OC) and/or orthochlorobenzal-malonotrite (CS), and shall attach supporting documentation of such contamination.
- 12. Physician, Certified Advanced Registered Nurse Practitioner, or Physician Assistant's Attestment. The physician shall check the appropriate box to indicate if the student is capable or not capable of participating in the BRTP activities indicated in item numbers 6, 6A, and 6B of this form.
