We are pleased to provide you with this Physician and Provider list introducing our FHCP Multispecialty Group's employed Primary Care Physicians and our Extended Hours/WorkForce Wellness Team. This list may be helpful for members interested in selecting a personal attending physician/primary care physician (PCP) and for those interested in providers in our Extended Hours/WorkForce Wellness sites.

Although all Primary Care Physicians in the FHCP network are fully capable of providing excellent primary care, there are certain benefits to having a FHCP employed Primary Care Physician:

- They are part of the FHCP multispecialty group that is connected by an electronic health record. An inter-connected electronic health record supports better information sharing between all your physicians and other members of the health care team.
- You have secure on-line access to your physician's office, via the patient portal, 24 hours per day, 7 days per week and can:
 - Request appointments;
 - Request medication renewals;
 - Ask general questions about your care or health issues; and
 - Receive lab results (soon to be released)
